peak 2.17 at $n \approx 10^{23.7}$
verified exponent, $\rho(n)/n$ with $\rho(n) = n(\ln\ln(n+16))^2/\sqrt{\ln(n+16)}$
above 2^n from $n = 50$
back below 2^n only at $n \approx e^{5504} \approx 10^{2390}$
brute force: 2^n
manuscript, general: $n\ln\ln n/\sqrt{\ln n}$ (not verified)
manuscript, fixed density: $n/\sqrt{\ln n}$ (not verified)
exponent relative to brute force
(bound $= 2^{\text{ratio}\cdot n}$ at $A = 1$)
